McCann
ROOFING PRODUCTS LTD

A SUSTAINABLE NATURAL BUILDING MATERIAL

About us

McCann - ABC Partnership

McCann Roofing Products Limited are now working in conjunction with ABC, one of our European manufacturer partners. The August Berentelg & Co. - ABC Clinker Group is one of the largest owner-managed family businesses in the brick industry in Germany.

With over 130 years of experience the product range is based on one of the oldest natural building materials, the clay. They have developed a range of building products which include facing bricks and pavers. The finesse and the innovative passion for bricks shape and define the company since 1887.

Today, the ABC Clinker Group is in the fifth generation and manufactures various building products at six locations in Germany.

Sustainability

We produce sustainable natural building materials as environmentally friendly as possible. For this reason, we focus on low energy consumption in production with gentle, efficient use of resources and low material consumption.

The natural slate clay of the Tecklenburger Land forms the basic material of our ABC products - a valuable, genuine natural product!

Innovative

The renaissance of bricks has shown that the brick as a building material has again successfully adapted to the new requirements and tasks of its time - that is why we are already working today on the brick products of tomorrow.

McCann are proud to be a supplier of the new Nordic clay system for facade and roof.

About McCann Nordic

Clay System

The new clay system McCANN NORDIC is a homogeneous, durable “brick tank” with traditional materials in a modern brick design.

It is light and easy to use. McCANN-NORDIC is quick to process, durable and suitable for renovations and new buildings. It combines the materiality of the facade and the roof so that the buildings appear to have been cast in one piece.

- **Open to diffusion**
- **Graffiti-resistant**
- **Recyclable**
- **Made from natural materials**
- **Available in different colours and formats on request**

Product Features

Frost-resistant

Environmentally friendly

Water absorption $\geq 6\%$

Colour-fast

Weatherproof

Fire behaviour: Euro-class A1

Standardised

Tile Format

Length	400mm
Width	175mm
Height	30mm
Material thickness	14mm
Weight	2.6kg
Lath spacing	Approx. 140mm

Colours

Rust Red - Available without any MOQs

Graffiti-Remover

McCann Nordic® is Graffiti Removable

Graffiti can be easily removed with McCann Nordic® Graffiti-Remover. It has become part of the appearance of our cities and villages, but it is rarely welcome.

On the one hand, they rarely meet the aesthetic taste of the house wall owners and on the other hand their removal is usually very costly. Although it is hardly possible to prevent the mostly night-time spraying activities, by choosing the building material for the exterior wall one can at least ensure that they disappear as quickly as they came and after their use they are 100% reused for the development of the next product.

Thanks to the extremely high firing temperatures in the manufacturing process, McCann-Nordic® has a surface that reliably prevents the penetration of all kinds of moisture - from rain or paint. That means: Graffiti remains on the surface and can be removed with the McCann graffiti remover fast and effortlessly and above all without any residues.
